

AS-Interface Master News (10/2024)

Waterworks increases safety and flexibility with ASi-5

How can you benefit from ASi and ASi-5 in practice? The **Englerup waterworks** provides a current example. The Danish company has installed a **new SCADA control system** (Supervisory Control and Data Acquisition), with an easily expandable **AS-Interface solution at its heart**, which was implemented with a minimum of cabling. All pumps, valves, and other components are now connected in a network controlled by an ASi master. The solution also features several **ASi-5 Motor Modules**, specially developed for **Danfoss frequency inverters from the VLT series**.
