The Bihl+Wiedemann app enables quick on-site diagnostics

Get the new Bihl+Wiedemann app now in the [Google Play Store](#) or [Apple Store](#). The intuitive app enables instant access to all necessary functions, technical documents, data sheets, and diagnostic data during service work. Optimize your on-site workflow and simplify the maintenance and servicing of machines.

The app's many functions save time and increase efficiency. A one-time login is all you need to use all the functions.

How technical staff benefit from the Bihl+Wiedemann app

- **Local device search:** On site, you can quickly search for relevant devices on the network and connect to them easily.
- **Access to the web server:** Using the app, you can access the devices' web servers, enabling you to retrieve diagnostic data and configure settings directly.
- **Online product search:** If more detailed product information is required, the app allows direct access to the product search function on the Bihl+Wiedemann website.
- **Download function:** All necessary documents, such as data sheets, can be downloaded directly via the app and made available offline.
