Active Distributor ASi-5 Motor Module with IO-Link interface for 24 V motorized rollers, IP54, M8 and M12, 1M

- ASi and AUX via profile cable

New standard ASi-5

IO-Link port class A and
IO-Link port class B in one housing

(figure similar)

suitable for

- 1 x 24 V motorized rollers SEW I2M

Cyclical writing of speeds and ramps possible

Protection degree IP54

(1) **Drive:**

It may also be suitable for controlling motorized rollers from other manufacturers with the same technical data, e.g. Pulseroller IDC. Please compare the manufacturer's specifications with the current values and the pin assignment of the motor module.

(2) **Line protection fuse:**

In the motor module UL approved fuses are placed before each of the motor supply connections. A short circuit in the motor causes this fuse to blow, protecting the connection cable between the module and motor.

After blowing the not exchangeable fuse the module is no longer functional and the module needs to be replaced. The characteristics of the fuse must be checked against the motor data before using the module.

The protection circuit in the module allows a very simple protection of the motor cables. The fuse for the cable protection is a slow-blow one; without short circuit the robust behavior of the module remains.

(3) **Input voltage (sensor supply)**

Inputs are supplied by ASi or by AUX (auxiliary 24 V power). If supplied by ASi, inputs shall not be connected to earth or to external potential.

(4) **Output voltage (actuator supply)**

Outputs are supplied by ASi or by AUX (auxiliary 24 V power). If supplied by ASi, outputs shall not be connected to earth or to external potential.

(5) **ASi connection**

The connection to ASi as well to AUX (auxiliary 24 V power) is made via yellow resp. black ASi profile cable with piercing technology or via M8 socket.

(1) The ASi-5 process data bandwidth depends on the ASi-5 profile. Further selectable profiles can be found in the hardware catalog of the Bihl+Wiedemann Suite or in the configuration manual.
