(1) **Interface, fieldbus**

Communication interface between fieldbus and gateway: interfaces for standardized fieldbus systems in industrial automation.

**Ethernet/IP+ Modbus TCP ASi Gateway:** interface for a Ethernet/IP+ Modbus TCP fieldbus

**OPC UA server:** interface for OPC UA communication.

(2) **Number of ASi networks, number of ASi Master**

"Double Master": 2 ASi networks, 2 ASi-5/ASi-3 Masters.

(3) **Integrated decoupling, ASi current measurement in the gateway**

"yes, max. 8 A/ASi network": Data decoupling integrated in the gateway. Cost-effective power for 2 ASi networks with 1 power supply (optionally supply of multiple Single Gateways by 1 power supply). Operation with short cable lengths with standard 24 V power supply possible.

(4) **Diagnostic and configuration interface**

"Ethernet fieldbus + Ethernet diagnostic": Access to ASi Master and Safety Monitor with Bihl+Wiedemann software by using the Ethernet diagnostic interface or Ethernet fieldbus interface

**The latest version of the device description file of the gateway is available in the "Downloads" section of the respective device.**

(5) **Recognition of duplicate ASi addresses**

Detects whether the same address has been assigned to two ASi nodes. Frequent error when using a hand held addressing device.

(6) **ASi fault detector**

Checks the AS-i line for interference effects such as noise, external voltages, etc.

(7) **Programming in C**

Using a C-program offers the possibility to run mini-PLC functions with a gateway.
